

Easy to setup. Easy to use.

The RS-228 uses wireless technology to send a signal from the tank to an inside base station. The station is the size of a pack of cards and can be placed in the kitchen, bedroom or any other convenient location in the home.

The tank monitor fits all remote ready gauges. It's range, up to 150 ft., is ideally suited for the typical residential application.

The base station has an easy-to-read display with both graphic and numerical read-outs of tank level. It includes low battery indicators for the base station and tank monitor.

Monitor Your LP level from your home!

Get accurate, up-to-the-minute LP gas level readings in your home. Place the base station in a convenient location such as the kitchen or bedroom. Then place the wireless tank monitor on your LP tank.

Remote Monitor:

- Weather Tight – suitable for continuous outdoor exposure
- Intrinsically Safe – suitable for mounting anywhere on your LP tank
- Wireless Operation – can be placed up to 100 feet from the inside base station
- Remote tank monitor requires 2 AA alkaline or lithium batteries

Base Station:

- Battery powered wireless system
- Displays accurate LP Gas Tank Level readings numerically and graphically
- Base Station requires 2 AAA alkaline batteries

Think of it as an emergency call eliminator.

It may seem small, but the RS-228 Wireless LP Gas Tank Level Meter provides a huge convenience for your customers. It gives them an accurate and up-to-date tank level reading anytime, from the comfort of their homes. That means they no longer have to remember to go outside and check their tank. And it means they will no longer have to make emergency calls to you to fill up an empty tank. It is a convenience for them and a real money saver for you.

The customer's happy. You're happy.

The RS-228 is a "must have" product for will-call customers. It provides the ultimate convenience, because they no longer have to go outside in inclement weather to check their tank levels. It is especially helpful for the elderly and housebound who may find it difficult getting to their tanks.

The tank level meter is a way for you to provide superior customer service, too. Will-call customers know how full their tanks are, so they call for a delivery before the tank gets critically low or runs out. This eliminates the expense of emergency deliveries for both you and your customer. What could be better than that?

Robertshaw makes it easy.

The RS-228 has a very affordable price point. That means you can sell it at a profit or give it away as an added convenience. Robertshaw provides marketing assistance to help create demand for the product among your customer base. Monitors and packaging are also available for private labeling. The monitor provides excellent reliability and comes with a 1 year manufacturer's warranty.

So, what are you waiting for? The RS-228 is an easy way for you to save money and keep your customers happy at the same time. Call to find out more today.
